Dear Kevin:

Some thought that because of the difficult economic times we are in, it was imprudent of me to begin a capital campaign in our parish, but with a combination of the generosity of our parishioners and your personable and professional approach, the parish was able to exceed the \$800,000 original goal by more than \$200,000.

When you met with the parish staff and Finance Committee, you provided exactly the services you promised and were always readily available to answer any questions and offer your professional recommendations when needed.

The dedicated efforts of you and your staff, especially Meghan Tenety, guided us every step of the way.

I am also very happy with the assistance you provide after the campaign was "officially" concluded in helping the parish record and keep track of the pledges which have generally been made over a three year period. Things are going very smoothly in this regard and I have received only compliments from parishioners.

Thank you for the services you provided and I would be certain to recommend Lynch Development Associates to my fellow pastors who might be interested in initiating a capital campaign for parish projects.

Sincerely,
